Lahore, Punjab

Objective

A self-motivated Junior Flutter Developer with extensive freelance experience and a strong foundation in cross-platform mobile and web applications. Skilled in MVVM architecture, Provider and Riverpod state management, Firebase integrations, and API handling. Continuously learning and excited to develop innovative solutions that enhance user experiences and drive technology forward.

Skills

- **Flutter & Dart Development**
- **State Management:** Provider, Riverpod, MVVM architecture
- **Backend Integrations:** Firebase Services
- **UI/UX Design:** Mobile and Web Applications
- **API Integration & Handling**
- **Problem-Solving & Critical Thinking**
- **Strong Communication and Team Collaboration**

Experience

Freelance Flutter Developer
Sep 2023 – Present

- Developed and deployed multiple mobile and web applications with a strong focus on usability and performance.
- Utilized Firebase for backend functionalities, including user authentication and real-time data synchronization.
- Implemented MVVM architecture for better code organization and maintenance, using Provider and Riverpod for efficient state management.
- Built custom UI components and implemented animations to enhance user experience.

Baby Wardrobe App
A Flutter-based E-commerce Web App

- Developed a fully functional web application using Flutter and Firebase to sell baby clothes and accessories.
- Integrated Firebase for backend functionalities like authentication and database management.
- Designed attractive, user-friendly UI components to enhance the shopping experience.
- https://m-ahsan-bilal.github.io/sweetchick

UI Design Projects

- Built multiple UI components and screens in Flutter for mobile applications, focusing on responsiveness and design consistency.

Education

Bachelor's in Computer Science
Institute of Management Sciences, Lahore
Mar 2023 – Present

ICS (Physics)
Islamia College Civil Lines, Lahore
